

There is NO proof that cell phone usage on the aircraft DOES NOT interfere with a/c navigational systems.

Cellphone usage would interfere with my doing my job especially in an emergency.

Cellphone usage would cause additional havoc and stress for the passengers.

Cellphone usage would allow terrorists greater leverage in a hijacking.

PLEASE, DO NOT pass a bill allowing cellphone usage during flight. You are only asking for trouble. We as flight attendants have enough responsibility as it is during a flight.
